DETAILED ACTION

Allowable Subject Matter

1. Claims 1-23 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or fairly suggest a vaporizer configured specifically as claimed. Nishizato et al., which is the most similarly configured piece of prior art, fails to teach a small aperture connecting between the liquid storing chamber and the vaporizing chamber so as to supply the liquid material to the vaporizing chamber, wherein said small aperture is continuously open to the vaporizing chamber and/or the capability of "communication between said liquid storing chamber and said vaporizing chamber *independently controlled by said actuator that opens and closes an end of said small aperture opening adjacent to said vaporizing chamber*". Further, no other piece of properly combinable art taught fairly taught combination of such a feature with Nishizato et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent No. 5,865,421 discloses valve structure for use in a vaporizer; however, not as presently claimed.
